

HARSHITA BAKSHI

Data Analyst | Risk Reporting & Analytics | Financial Services

+91 9340071753 | bakshiharshita918@gmail.com | [linkedin.com/in/harshita-bakshi](https://www.linkedin.com/in/harshita-bakshi) | [Portfolio](#) | Gurgaon, Haryana, India

PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience building interactive dashboards, predictive models, and regulatory reporting solutions across sales, finance, and content analytics. Proficient in Power BI, Python, SQL, and Excel, with demonstrated ability to translate large, complex datasets into actionable insights through structured KPI frameworks, data governance practices, and visual storytelling. Strong analytical and problem-solving skills with excellent communication and collaboration abilities; eager to contribute to risk-based decisioning, process automation, and reporting automation in fast-paced, global financial services environments.

CORE COMPETENCIES

Data Analysis & Reporting: Data Cleaning, EDA, Statistical Analysis, KPI Design, Time-Series Forecasting, Regulatory Reporting

BI & Visualization Tools: Microsoft Excel, Power BI (DAX, Power Query), Tableau, Looker Studio, PowerPoint

Programming & Databases: Python (Pandas, Matplotlib, Seaborn, Scikit-learn), SQL, MySQL, MongoDB

Risk & Compliance Analytics: Operational Risk Reporting, Control Environment Monitoring, Data Governance, Compliance Data Analysis, Process Automation

KEY PROJECTS

Amazon Sales Performance Dashboard | *Power BI, Excel, DAX*

Jun–Jul 2025

- Analysed 500K+ rows of regional sales data across multiple categories, simulating merchant-level reporting in a financial services payment network context; surfaced KPIs including revenue trends, return rates, and category growth.
- Designed stakeholder-ready drill-through dashboards with DAX measures, reducing manual reporting effort by ~40% through automated conditional formatting and dynamic slicers for data governance compliance.

Olist Brazil Sales Forecast Dashboard | *Python, Power BI, Scikit-learn*

2026

- Built a monthly sales forecasting model using Python and time-series techniques across 100K+ transactions, achieving accurate seasonality detection; integrated model outputs into Power BI for regulatory reporting-style visualisation of sales drivers.
- Identified top 5 revenue-contributing segments and delivery performance bottlenecks, translating raw data into compliance-relevant operational insights that informed process automation recommendations.

S&P 500 Sector Forecast Dashboard | *Python, Power BI, Pandas*

2026

- Performed time-series forecasting on 10+ years of historical financial services data to project sector-level investment performance; visualised trend lines, volatility bands, and sector comparisons — strengthening understanding of risk management and financial data governance concepts.

US Superstore & Netflix Content Dashboards | *Power BI, Excel*

2026

- Built end-to-end dashboards tracking 3+ years of orders, profit, discount impact, and content trends across 10K+ records; applied metric benchmarking and control environment monitoring techniques to surface underperforming segments.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Disha College, Raipur | Grade A | Data Structures, DBMS, Statistics, Web Development

CERTIFICATIONS

Applied Data Analytics — NIT Raipur (Jun 2024)

Deloitte Data Analytics Job Simulation — Forage (Jul 2025)

Power BI for Beginners — Simplilearn (Sep 2025)
